To whom it may concern,

I am writing and representing 9 other people. There used to be a time in this country when life was respected and protected. The most protected place that a human could be was in their mother's womb. NOW the most dangerous place for a human to be is in their mother's womb. It seems that the people in this country have lowered themselves to beneath an animal's level and are disposing of their conceptions as easily as popping pills. We are not GOD but we keep on trying to play the roll!

We are totally against the use of these pills to dispose of a fertilized egg. I am a registered nurse and I have not bought into the lies that are being told about unborn babies.

May God have mercy on all those who have been granted the "gift of life" but who see fit to take it upon themselves to be involved directly or indirectly in disposing of this "gift" so readily ~~

Respectfully submitted,

Trudy M. Selig
